PUBLISHED AT YALE UNIVERSITY FOR
THE AMERICAN SOCIETY OF BIOLOGICAL CHEMISTS, INC.
WAVERLY PRESS, INC.
BALTIMORE 2, U. S. A.

CONTENTS OF VOLUME 210

No. 1, September, 1954

PAGE

Bruice, Thomas C., Winzler, Richard J., and Kharasch, Norman. The thyroxine-like activity of some new thyroxine analogues in Amphibia 1

Kit, Saul, and Awapara, Jorge. On the relative constancy of the free amino acids of lymphatic tissues 11

Meister, Alton. Studies on the mechanism and specificity of the glutamine-α-keto acid transamination-deamidation reaction 17

Meister, Alton, and Fraser, Phyllis E. Enzymatic formation of L-asparagine by transamination 37

Irvin, J. Logan, and Irvin, Elinor Moore. The interaction of quinacrine with adenine nucleotides 45

Kaplan, J. Gordin, and Fraser, M. J. The expansion of monomolecular films of ovalbumin. Plates 1 and 2 57

Kuby, Stephen A., Noda, Lafayette, and Lardy, Henry A. Adenosinetriphosphate-creatine transphosphorylase. III. Kinetic studies 65

Noda, Lafayette, Kuby, Stephen A., and Lardy, Henry A. Adenosinetriphosphate-creatine transphosphorylase. IV. Equilibrium studies 83

Viswanatha, T., and Liener, Irvin E. Inhibition of trypsin. I. Sequence of mixing the reactants 97

Grisolia, Santiago, and Burris, R. H. Preparation of glutamate and carbamyl glutamate selectively labeled with deuterium 109

Fox, Sidney W., and Warner, Carol. Antagonism between phenylalanine and various isomers of phenylserine in two lactobacilli 119

Kemp, A. D., Kappas, Attallah, Salamon, Ivan I., Herling, F., and Gallagher, T. F. Studies in steroid metabolism. XXIV. Identification and characterization of 3β-hydroxy-$\Delta^{9(11)}$-androstene-17-one and 3β,11β-dihydroxyandrostane-17-one from human urine 123

Fukushima, David K., Kemp, A. D., Schneider, R., Stokem, Madeleine B., and Gallagher, T. F. Studies in steroid metabolism. XXV. Isolation and characterization of new urinary steroids 129

Clark, Carroll T., Weissbach, Herbert, and Udenfriend, Sidney. 5-Hydroxytryptophan decarboxylase: preparation and properties 139

Mackler, Bruce, Mahler, H. R., and Green, D. E. Studies on metalloflavoproteins. I. Xanthine oxidase, a molybdoflavoprotein 149

Mahler, H. R., and Elowe, Dorothee G. Studies on metalloflavoproteins. II. The rôle of iron in diphosphopyridine nucleotide cytochrome *c* reductase. 165

Siperstein, M. D., Harold, Franklin M., Chaikoff, I. L., and Dauben, W. G. C^{14}-Cholesterol. VI. Biliary end-products of cholesterol metabolism 181

MacLeod, Robert A., and Onofrey, Eva. Cation antagonism of the antibacterial action of amines 193

Williams, William J., and Thorne, Curtis B. Biosynthesis of glutamyl peptides from glutamine by a transfer reaction 203

Mounter, L. A., and Chanutin, Alfred. Dialkylfluorophosphatase of kidney. III. Studies of activation and inhibition by cofactors 219

Fones, William S., and Lee, Marguerite. Hydrolysis of the *N*-trifluoroacetyl derivatives of several D- and L-amino acids by acylase I 227

XUM

KLEIBER, MAX, BLACK, ARTHUR L., BROWN, MARY A., LUICK, JACK, BAXTER, CLAUDE F., and TOLBERT, BERT M. Butyrate as a precursor of milk constituents in the intact dairy cow 239
RIEGEL, ILSE L., and MUELLER, GERALD C. Formation of a protein-bound metabolite of estradiol-16-C^{14} by rat liver homogenates 249
SCHAYER, RICHARD W., WU, KWANG YING TAI, SMILEY, ROSA L., and KOBAYASHI, YUTAKA. Studies on monoamine oxidase in intact animals 259
KUN, ERNEST, DECHARY, J. M., and PITOT, H. C. The oxidation of glycolic acid by a liver enzyme 269
GREEN, ARDA ALDEN, and BUMPUS, F. MERLIN. The purification of hog renin substrate 281
BUMPUS, F. MERLIN, GREEN, ARDA ALDEN, and PAGE, IRVINE H. Purification of angiotonin 287
KUPKE, DONALD W., ELDREDGE, NOREEN T., and LUCK, J. MURRAY. Nonfibrous desoxypentose nucleohistone from liver. II. Sedimentation and electrophoretic properties 295
SUTTON, W. B. Isolation and properties of a lactic oxidative decarboxylase from *Mycobacterium phlei* 309
RUTMAN, ROBERT J., CANTAROW, ABRAHAM, and PASCHKIS, KARL E. The catabolism of uracil *in vivo* and *in vitro* 321
ROSE, WILLIAM C., COON, MINOR J., and LAMBERT, G. FREDERICK. The amino acid requirements of man. VI. The rôle of the caloric intake 331
MOLDAVE, KIVIE. The effect of Theiler's GD VII virus on the intracellular distribution of radiophosphorus in mouse brain *in vitro* 343
FAIRLEY, JAMES L. The growth-promoting effect of certain amino acids for *pyrimidineless Neurospora* mutants 347
RUDNEY, HARRY. The synthesis of *dl*-propanediol-1-phosphate and C^{14}-labeled propanediol and their isolation from liver tissue 353
RUDNEY, HARRY. Propanediol phosphate as a possible intermediate in the metabolism of acetone 361
REGE, D. V., and SREENIVASAN, A. The influence of folic acid and vitamin B_{12} on nucleic acid metabolism in microorganisms 373
DEMAIN, ARNOLD L., and PHAFF, H. J. Hydrolysis of the oligogalacturonides and pectic acid by yeast polygalacturonase 381
GOTS, JOSEPH S., and LOVE, SAMUEL H. Purine metabolism in bacteria. II. Factors influencing biosynthesis of 4-amino-5-imidazolecarboxamide by *Escherichia coli* 395
SAZ, ARTHUR K., and SLIE, RITA B. Reversal of Aureomycin inhibition of bacterial cell-free nitro reductase by manganese 407
FRIEDMANN, BERNICE, NAKADA, HENRY I., and WEINHOUSE, SIDNEY. A study of the oxidation of formic acid in the folic acid-deficient rat 413
WEINHOUSE, SIDNEY, and FRIEDMANN, BERNICE. A study of formate production in normal and folic acid-deficient rats 423
BRIN, MYRON, OLSON, ROBERT E., and STARE, F. J. Metabolism of cardiac muscle. VIII. Pyridoxine deficiency 435
BRAWERMAN, GEORGE, and CHARGAFF, ERWIN. On a deoxyribonuclease from germinating barley 445
ANDERSSON-KOTTÖ, I., EHRENSVÄRD, G., HÖGSTRÖM, G., REIO, L., and SALUSTE, E. Amino acid formation and utilization in *Neurospora* 455
MAHLER, H. R., MACKLER, BRUCE, GREEN, D. E., and BOCK, ROBERT M. Studies on metalloflavoproteins. III. Aldehyde oxidase: a molybdoflavoprotein .. 465

No. 2, October, 1954

Dickman, Sherman R., and Westcott, Wayne L. Reactions of xanthydrol. I. Amino acids 481
Dickman, Sherman R., Kropf, Rita B., and Proctor, Charles M. Reactions of xanthydrol. II. Insulin, lysozyme, and ribonuclease 491
Westcott, Wayne L., and Dickman, Sherman R. Reactions of xanthydrol. III. Preparation and properties of xanthylcytochrome *c* 499
McNutt, Walter S. The direct contribution of adenine to the biogenesis of riboflavin by *Eremothecium ashbyii* 511
Spoerl, Edward, and Carleton, Richard. Studies on cell division. Nitrogen compound changes in yeast accompanying an inhibition of cell division 521
Burr, William W., Jr., Dunkelberg, Carolyn, McPherson, James C., and Tidwell, Herbert C. Blood levels of absorbed labeled fat and chylomicronemia 531
Von Korff, R. W. A specific enzymatic micromethod for the determination of acetate 539
Weinbach, Eugene C. The effect of pentachlorophenol on oxidative phosphorylation 545
Schucher, Reuben, and Hokin, Lowell E. The synthesis and secretion of lipase and ribonuclease by pigeon pancreas slices 551
Tabor, Herbert, and Mehler, Alan H. Isolation of *N*-formyl-L-glutamic acid as an intermediate in the enzymatic degradation of L-histidine 559
Thoma, Richard W., and Peterson, W. H. The enzymatic degradation of soluble bound biotin 569
Sols, Alberto, and Crane, Robert K. Substrate specificity of brain hexokinase 581
Crane, Robert K., and Sols, Alberto. The non-competitive inhibition of brain hexokinase by glucose-6-phosphate and related compounds 597
Casida, J. E., Allen, T. C., and Stahmann, Mark A. Mammalian conversion of octamethylpyrophosphoramide to a toxic phosphoramide *N*-oxide 607
MacGee, Joseph, and Doudoroff, Michael. A new phosphorylated intermediate in glucose oxidation 617
Charkey, L. W., Kano, Adeline K., and Anderson, John A. Effects of fasting on free amino acid levels in chick blood as modified by vitamin B_{12} 627
Byerrum, Richard U., Flokstra, John H., Dewey, Lovell J., and Ball, Charles D. Incorporation of formate and the methyl group of methionine into methoxyl groups of lignin 633
Byerrum, Richard U., Hamill, Robert L., and Ball, Charles D. The incorporation of glycine into nicotine in tobacco plant metabolism 645
Preedy, J. R. K. A method for the estimation of inulin in plasma and urine containing dextran 651
Berg, Paul, and Joklik, W. K. Enzymatic phosphorylation of nucleoside diphosphates 657
Wu, Chung, and Bollman, Jesse L. Effect of ethionine on the free amino acids in the rat 673
High, Edward G., Smith, Haywood C., Jr., Taylor, Harold H., and Wilson, Sherman S. Antioxidant studies concerned with the metabolism of carotene and vitamin A 681
Hofmann, Klaus, and Panos, Charles. The biotin-like activity of lactobacillic acid and related compounds 687

GREEN, IRVING, and MOMMAERTS, W. F. H. M. Adenosinetriphosphatase systems of muscle. IV. Kinetics of myosin adenosinetriphosphatase 695
ROE, JOSEPH H., and PAPADOPOULOS, NICHOLAS M. The determination of fructose-6-phosphate and fructose-1,6-diphosphate 703
RALLS, JACK W., SAUNDERS, FRANCIS J., RAYMOND, A. L., and RIEGEL, BYRON. Two reduction products from the adrenal perfusion of pregnane-3,20-dione. 709
STEVENS, CARL M., VOHRA, PRAN, MOORE, JOSEPH E., and DE LONG, CHESTER W. Availability of cysteine derivatives for the biosynthesis of penicillins. 713
VANATTA, JOHN C., and COX, CATHERINE CARR. Quantitative determination of serum sodium involving separation of cations on a resin column 719
HOGEBOOM, GEORGE H., and KUFF, EDWARD L. Sedimentation behavior of proteins and other materials in a horizontal preparative rotor 733
VITALE, J. J., HEGSTED, D. MARK, MCGRATH, HELEN, GRABLE, E., and ZAMCHECK, N. The effect of acetate, pyruvate, and glucose on alcohol metabolism 753
GRISOLIA, SANTIAGO, BURRIS, R. H., and COHEN, P. P. Fate of deutero-labeled carbamyl glutamate in citrulline biosynthesis 761
CURRAN, GEORGE L. Effect of certain transition group elements on hepatic synthesis of cholesterol in the rat 765
FLAVIN, MARTIN. The linkage of phosphate to protein in pepsin and ovalbumin. 771
HIRSCH, P. F., BARUCH, H., and CHAIKOFF, I. L. The relation of glucose oxidation to lipogenesis in mammary tissue 785
STANIER, R. Y., and INGRAHAM, J. L. Protocatechuic acid oxidase 799
MACDONALD, D. L., STANIER, R. Y., and INGRAHAM, J. L. The enzymatic formation of β-carboxymuconic acid 809
SISTROM, W. R., and STANIER, R. Y. The mechanism of formation of β-ketoadipic acid by bacteria 821
RABINOVITZ, M., OLSON, MARGARET E., and GREENBERG, DAVID M. Independent antagonism of amino acid incorporation into protein 837
CLARK, HAROLD W., NEUFELD, HAROLD A., WIDMER, CARL, and STOTZ, ELMER. Purification of a factor linking succinic dehydrogenase with cytochrome *c*. . 851
WIDMER, CARL, CLARK, HAROLD W., NEUFELD, HAROLD A., and STOTZ, ELMER. Cytochrome components of the soluble SC factor preparation 861
NEUFELD, HAROLD A., SCOTT, CHARLES R., and STOTZ, ELMER. Purification of heart muscle succinic dehydrogenase 869
MAYERS, VIRGINIA LYTLE, and SPIZIZEN, JOHN. The isolation of desoxyribonucleic acid from bacteriophages by an improved method 877
ATKINSON, DANIEL E., and MCFADDEN, BRUCE A. The biochemistry of *Hydrogenomonas*. I. The hydrogenase of *Hydrogenomonas facilis* in cell-free preparations 885
BLACK, ARTHUR L., and KLEIBER, MAX. Level of fixed carbon in amino acids of casein measured in the intact dairy cow 895
MALEY, GLADYS FELDOTT, and LARDY, HENRY A. Phosphorylation coupled with the oxidation of reduced cytochrome *c* 903
LEHNINGER, ALBERT L., UL HASSAN, MANSOOR, and SUDDUTH, HERSCHEL C. Phosphorylation coupled to the oxidation of ascorbic acid by isolated mitochondria 911
SILBER, ROBERT H., and PORTER, CURT C. The determination of 17,21-dihydroxy-20-ketosteroids in urine and plasma 923
KOCHAKIAN, CHARLES D., and STIDWORTHY, GEORGE. Metabolism of Δ^4-androstene-3,17-dione by tissue homogenates 933

HUMPHREYS, T. E., NEWCOMB, ELDON H., BOKMAN, ANN H., and STUMPF, P. K. Fat metabolism in higher plants. II. Oxidation of palmitate by a peanut particulate system 941
STANBURY, S. W., and MUDGE, GILBERT H. Polyphasic response of respiration and aerobic phosphorylation to 2,4-dinitrophenol 949
MUDGE, GILBERT H., NEUBERG, HANS W., and STANBURY, S. W. The effect of 2,4-dinitrophenol on the formation of phosphoenolpyruvate by liver mitochondria 965
INDEX TO VOLUME 210 981
